

Publications

1995

(1) "A very useful and efficient Wacker oxidation of higher α -olefins in the presence of per(2,6-di-O-methyl)- β -cyclodextrin"

E. Monflier, S. Tilloy, G. Fremy, Y. Barbaux, A. Mortreux, *Tetrahedron Lett.* **1995**, *36*, 387-388.

(2) "A Further Breakthrough in Biphasic, Rhodium Catalyzed Hydroformylation: the Use of Per(2,6-di-O-methyl)- β -Cyclodextrin as Inverse Phase Transfer Catalyst"

E. Monflier, S. Tilloy, G. Fremy, Y. Castanet, A. Mortreux, *Tetrahedron Lett.* **1995**, *36*, 9481-9484.

1996

(3) "Wacker Oxidation of Various Olefins in the Presence of Per(2,6-di-O-methyl)- β -cyclodextrin: Mechanistic Investigations of a Multistep Catalysis in a Solvent Free Two Phase System"

E. Monflier, S. Tilloy, Y. Barbaux, E. Blouet, A. Mortreux, *J. Mol. Catal. A: Chemical* **1996**, *109*, 27-35.

1997

(4) "A New Fruitful Development in Biphasic Catalysis: the Palladium-Catalyzed Hydrocarboxylation of Alkenes"

S. Tilloy, E. Monflier, F. Bertoux, Y. Castanet, A. Mortreux, *New J. Chem.* **1997**, *21*, 529-531.

(5) "New Prospects for the Palladium Catalyzed Hydrocarboxylation of Higher α -Olefins in Two-Phase System: the Use of Chemically Modified- β -Cyclodextrin"

E. Monflier, S. Tilloy, F. Bertoux, Y. Castanet, A. Mortreux, *New J. Chem.* **1997**, *21*, 857-859.

1998

(6) "Chemically Modified β -Cyclodextrins: Efficient Supramolecular Carriers for the Biphasic Hydrogenation of Water-Insoluble Aldehydes"

E. Monflier, S. Tilloy, Y. Castanet, A. Mortreux, *Tetrahedron Lett.* **1998**, *39*, 2959-2960.

1999

(7) "A Convenient Synthesis of Phenylpropanoic Acids: the Palladium Catalyzed Hydrocarboxylation of Styrene Derivatives in a Two-Phase System"

F. Bertoux, S. Tilloy, E. Monflier, Y. Castanet, A. Mortreux, *J. Mol. Catal. A: Chemical* **1999**, *138*, 53-57.

(8) "Chemically Modified β -Cyclodextrins in Biphasic Catalysis: a Fruitful Contribution of the Host-Guest Chemistry to the Transition-Metal Catalyzed Reactions"

S. Tilloy, E. Monflier, F. Bertoux, A. Mortreux, *Catalysis Today* **1999**, *48*, 245-253.

(9) "First Evidence of Molecular Recognition Between Cyclodextrins and a Water-soluble Ligand Used in Aqueous Phase Organometallic Catalysis"

E. Monflier, S. Tilloy, C. Méliet, A. Mortreux, D. Landy, S. Fourmentin, G. Serpateanou, *New J. Chem.* **1999**, 23, 469-472.

(10) "Comparative Raman Spectroscopy Study of Sulfonated triphenylphosphines"
S. Tilloy, E. Monflier, D. Bormann, *Vib. Spectrosc.* **1999**, 20, 165-172.

(11) "Chemically Modified β -Cyclodextrin as Supramolecular Carriers in Biphasic Palladium Catalyzed Cleavage of Allylic Carbonates: Activity Enhancement and Substrate Selective Catalysis

T. Lacroix, H. Bricout, S. Tilloy, E. Monflier, *Eur. J. Org. Chem.* **1999**, 3127-3129.

2000

(12) "Study of inclusion complexes of the β -cyclodextrin with the sodium salt of trisulfonated triphenylphosphine"

L. Caron, S. Tilloy, E. Monflier, R. J.M. Wieruszewski, G. Lippens, D. Landy, S. Fourmentin, G. Surpateanu, *J. Inclusion Phenom.* **2000**, 38, 361-379.

2001

(13) "Rhodium Catalyzed Hydroformylation of Water Insoluble Olefins in the Presence of Chemically Modified β -Cyclodextrins: evidence for ligand-cyclodextrin interactions and effect of various parameters on the catalytic activity and the aldehydes selectivity"

T. Mathivet, C. Meliet, Y. Castanet, A. Mortreux, L. Caron, S. Tilloy, E. Monflier, *J. Mol. Catal.* **2001**, 176, 105-116.

(14) "Convenient Synthesis of New Amphiphilic Triphenylphosphine Analogues for Aqueous Biphasic Catalysis"

L. Caron, M. Canipelle, S. Tilloy, H. Bricout, E. Monflier, *Tetrahedron Lett.* **2001**, 42, 8837-8840.

2002

(15) "One and Two-Dimensional NMR Investigations of the Inclusion of the Monosulfonated Triphenylphosphine in the β -Cyclodextrin"

L. Caron, C. Christine, S. Tilloy, E. Monflier, D. Landy, S. Fourmentin, G. Serpateanou, *Supramolecular Chem.* **2002**, 14, 11-20.

(16) "Cyclodextrins as Inverse Phase Transfer Catalysts for the Biphasic Catalytic Hydrogenation of Aldehydes: A Green and Easy Alternative to Conventional Mass Transfer Promoters"

S. Tilloy, H. Bricout, E. Monflier, *Green Chem.* **2002**, 4, 188-193.

(17) "Thermodynamic Insight into the Origin of the Inclusion of Monosulfonated Isomers of Triphenylphosphine in the β -Cyclodextrin"

M. Canipelle, L. Caron, C. Christine, S. Tilloy, E. Monflier, *Carbohydrate Research* **2002**, 337, 281-287.

(18) "Phosphocontaining Cyclodextrins as a New Class of Supramolecular Structures"

M.K. Gratchev, G.I. Kurochkina, E. Monflier, S. Tilloy, H. Bricout, E.E. Nifantiev, *Phosphorus Sulfur and Silicon and the Related Elements* **2002**, 177, 1489-1492.

(19) "Theoretical investigations of the inclusion processes of (4-tert-butylphenyl)(3-sulfonatophenyl) (phenyl)phosphine in β -cyclodextrin"

N. Blidi Boukamel, A. Krallafa, D. Bormann, L. Caron, M. Canipelle, S. Tilloy, E. Monflier, *J. Inclusion Phenom* **2002**, 42, 269-274.

2003

(20) "Unexpected effect of cyclodextrins on water-soluble phosphine modified rhodium hydroformylation catalysts"

L. Caron, M. Canipelle, S. Tilloy, H. Bricout, E. Monflier, *Eur. J. Inorg. Chem* **2003**, 595-599.

(21) "Complexation of monosulfonated triphenylphosphine oxides with β -cyclodextrin: Spectroscopic study and consequence on the behaviour of cyclodextrins in aqueous-phase organometallic catalysis"

M. Canipelle, L. Caron, H. Bricout, S. Tilloy, E. Monflier, *New. J. Chem.* **2003**, 27, 1603-1608.

2004

(22) "Behavior of α -, β -, γ -cyclodextrins and their derivatives on an *in Vitro* model of blood brain barrier"

V. Monnaert, S. Tilloy, H. Bricout, L. Fenart, R. Cecchelli, E. Monflier, *J. Pharmacol. Exp. Ther.* **2004**, 310, 745-751.

(23) "High-Pressure $^{31}\text{P}\{^1\text{H}\}$ NMR studies of $\text{RhH}(\text{CO})(\text{TPPTS})_3$ in the presence of methylated cyclodextrins: New light on rhodium catalyzed hydroformylation reaction assisted by cyclodextrins"

E. Monflier, H. Bricout, F. Hapiot, S. Tilloy, A. Aghmiz, A. M. Masdeu-Bultó, *Adv. Synth. Catal.* **2004**, 346, 425-431.

(24) "Cyclodextrins or calixarenes: What is the best mass transfer promoter for Suzuki cross-coupling reactions in water ? "

F. Hapiot, J. Lyskawa, H. Bricout, S. Tilloy, E. Monflier, *Adv. Synth. Catal.* **2004**, 346, 83-89.

(25) "Effect of γ -cyclodextrin and hydroxypropyl γ -cyclodextrin on the transport of doxorubicine across an *in Vitro* model of blood brain barrier"

V. Monnaert, D. Betbeder, L. Fenart, H. Bricout, A.M. Lenfant, R. Cecchelli, E. Monflier, S. Tilloy, *J. Pharmacol. Exp. Ther.* **2004**, 311, 1115-1120.

(26) "Molecular recognition between a water-soluble organometallic complex and a β -cyclodextrin: First example of second-sphere coordination adducts possessing a catalytic activity"

L. Caron, H. Bricout, S. Tilloy, D. Landy, S. Fourmentin, E. Monflier, *Adv. Synth. Catal.* **2004**, 346, 1449-1456.

2005

(27) "Adamantoylated monosaccharides: new compounds for modification of cyclodextrin-containing material properties"

C. Binkowski, V. Lequart, F. Hapiot, S. Tilloy, R. Cecchelli, E. Monflier, P. Martin, *Carbohydrate Research* **2005**, 340, 1461-1468.

(28) "Complexation of monosulfonated triphenylphosphine with chemically modified β -cyclodextrins: Effect of substituents on the stability of inclusion complexes"
M. Canipelle, S. Tilloy, A. Ponchel, H. Bricout, E. Monflier, *J. Inclusion Phenom* **2005**, *51*, 79-85.

(29) "Sulfonated Xantphos ligand and methylated cyclodextrin: a winning combination for rhodium catalysed hydroformylation of higher olefins in aqueous medium"
L. Leclercq, F. Hapiot, S. Tilloy, K. Ramkisoensing, J.N.H. Reek, Piet W.N.M. van Leeuwen, E. Monflier, *Organometallics* **2005**, *24*, 2070-2075.

(30) "Rhodium complexes non-covalently bound to cyclodextrins: Novel water-soluble supramolecular catalysts for the biphasic hydroformylation of higher olefins"
B. Sueur, L. Leclercq, M. Sauthier, Y. Castanet, A. Mortreux, H. Bricout, S. Tilloy, E. Monflier, *Chem. Eur. J.* **2005**, *11*, 6228-6236.

2006

(31) "Supramolecular trapping of phosphanes by cyclodextrins: A general approach to generate phosphane coordinatively unsaturated organometallic complexes"
C. Binkowski-Machut, M. Canipelle, H. Bricout, S. Tilloy, F. Hapiot, E. Monflier, *Eur. J. Inorg. Chem.* **2006**, 1611-1619.

(32) "Heptakis(2,3-di-*O*-methyl-6-*O*-sulfopropyl)- β -cyclodextrin: a genuine supramolecular carrier for the Aqueous Organometallic Catalysis"
D. Kirschner, T. Green, F. Hapiot, S. Tilloy, L. Leclercq, H. Bricout, E. Monflier, *Adv. Synth. Catal.* **2006**, *348*, 379-386.

(33) "Hydroformylation of 1-decene in aqueous medium catalyzed by rhodium/alkyl sulfonated diphosphines system in the presence of methylated β -cyclodextrins. How the flexibility of the diphosphine backbone influences the regioselectivity"
S. Tilloy, G. Crowyn, E. Monflier, Piet W.N.M. van Leeuwen, J.N.H. Reek, *New. J. Chem.* **2006**, *30*, 377-383.

(34) "Methylated β -cyclodextrin as P-gp modulators for delivrance of doxorubicin across an *in vitro* model of blood-brain barrier"
S. Tilloy, V. Monnaert, L. Fenart, H. Bricout, R. Cecchelli, E. Monflier, *Bioorg. Med. Chem. Lett.* **2006**, *16*(8), 2154-2157.

(35) "Cyclodextrins as supramolecular host for organometallic complexes"
F. Hapiot, S. Tilloy, E. Monflier, *Chem. Rev.* **2006**, *106*, 767-781.

(36) "Water-soluble triphenylphosphane-3,3',3''-tricarboxylate (*m*-TPPTC) ligand and methylated cyclodextrins: a new combination for biphasic rhodium catalyzed hydroformylation of higher olefins"
S. Tilloy, F. Hapiot, D. Landy, S. Fourmentin, V. Michelet, J.P. Genêt, E. Monflier *Adv. Synth. Catal.* **2006**, *348*, 1547-1522.

2007

(37) "Biphasic aqueous organometallic catalysis promoted by cyclodextrins. Can surface tension measurements explain the efficiency of chemically modified cyclodextrins ?"
L. Leclercq, H. Bricout, S. Tilloy, E. Monflier *J. Colloid Interface Sci.* **2007**, *307*, 481-487.

(38) "Self-assembled supramolecular bidentate ligands for aqueous organometallic catalysis"
C. Machut, J. Patrigeon, S. Tilloy, H. Bricout, F. Hapiot, E. Monflier, *Angew. Chem. Int. Ed.* **2007**, *46*, 3040-3042

(39) "Complexation of phosphine ligands with peracetylated β -cyclodextrin in supercritical carbon dioxide: spectroscopic determination of equilibrium constants"
A. Galia, E. C. Navarre, O. Scialdone, M. Ferreira, G. Filardo, S. Tilloy, E. Monflier, *J. Phys. Chem. B* **2007**, *111*, 2573-2578

2008

(40) "Biphasic Aqueous Organometallic Catalysis Promoted by Cyclodextrins: How to Design the Water-Soluble Phenylphosphane to Avoid Interaction with Cyclodextrin"
M. Ferreira, H. Bricout, A. Sayede, A. Ponchel, S. Fourmentin, S. Tilloy, E. Monflier, *Adv. Synth. Catal.* **2008**, *350*, 609-618.

(41) "Rhodium-catalyzed Hydroformylation Promoted by Modified Cyclodextrins: Current Scope and Future Developments"
F. Hapiot, L. Leclercq, N. Azaroual, S. Fourmentin, S. Tilloy, E. Monflier, *Current Organic Synthesis*, **2008**, *15* (2), 162-172.

(42) "A property-matched water-soluble analogue of the benchmark ligand PPh₃"
M. Ferreria, H. Bricout, A. Sayede, F. Hapiot, S. Tilloy, E. Monflier, *ChemSusChem* **2008**, *1*, 631-636.

(43) "Easily accessible mono and polytopic β -cyclodextrin hosts by click chemistry"
M. Mourer, F. Hapiot, S. Tilloy, E. Monflier, S. Menuel, *Eur. J. Org. Chem.*, **2008**, 5723-5730

2009

(44) "Aqueous hydroformylation reaction mediated by randomly methylated beta-cyclodextrin: How substitution degree influences catalytic activity and selectivity"
F.X. Legrand, M. Sauthier, C. Flahaut, J. Hachani, C. Elfakir, S. Fourmentin, S. Tilloy, E. Monflier, *J. Mol. Catal.* **2009**, *303*, 72-77.

(45) "Aqueous rhodium-catalyzed hydroformylation of 1-decene in the presence of randomly methylated beta-cyclodextrin and 1,3,5-triaza-7-phosphaadamantane derivatives"
F.X. Legrand, F. Hapiot, S. Tilloy, A. Guerriero, M. Peruzzini, L. Gonsalvi, E. Monflier, *Appl. Catal., A* **2009**, *362*, 62-66.

(46) "Chemically Modified Cyclodextrins: An Attractive Class of Supramolecular Hosts for the Development of Aqueous Biphasic Catalytic Processes"
H. Bricout, F. Hapiot, A. Ponchel, S. Tilloy, E. Monflier, *Sustainability* **2009**, *1*, 924-945.
(Article sur invitation – Numéro spécial "Sustainable Approaches within the Chemical Sciences"). Open access: <http://www.mdpi.com/2071-1050/1/4/924>.

2010

(47) "β-Cyclodextrins modified by alkyl and poly(ethylene oxide) chains: A novel class of mass transfer additives for aqueous organometallic catalysis"

N. Badi, P. Guegan, F.X. Legrand, L. Leclercq, S. Tilloy, E. Monflier, *J. Mol. Catal.* **2010**, 318, 8-14. **EDITORS CHOICE PAPER**

(48) "Properties and catalytic activities of new easily-made amphiphilic phosphanes for aqueous organometallic catalysis"

M. Ferreira, H. Bricout, N. Azaroual, C. Gaillard, D. Landy, S. Tilloy, E. Monflier, *Adv. Synth. Catal.* **2010**, 352, 1193-1203. **SELECTED PAPER: Hottest articles in Green & Sustainable Chemistry**

(49) "New Phosphane based on a β-Cyclodextrin exhibiting a Solvent-Tunable Conformation and its Catalytic Properties"

C. Machut-Binkowski, F. X. Legrand, N. Azaroual, S. Tilloy, E. Monflier, *Chem. Eur. J.* **2010**, 16, 10195-10201.

(50) "Cyclodextrins as mass transfer additives in aqueous organometallic catalysis"

H. Bricout, F. Hapiot, A. Ponchel, S. Tilloy, E. Monflier, *Curr. Org. Chem.* **2010**, 14, 1296-1307.

2011

(51) "Cyclodextrins and their Applications in Aqueous-Phase Metal-Catalyzed Reactions"

F. Hapiot, Ponchel, A.; Tilloy, S.; Monflier, E., *C. R. Chimie* **2011**, 14, 149-166. (**Thematic issue of Comptes rendus Chimie entitled “Chemistry and biochemistry of Carbohydrates”.** Guest Editors **Pierre Sinaÿ and Matthieu Sollogoub**)

(52) "Interaction of water-soluble triphenylphosphines with β-cyclodextrin: a quantum chemistry study" A. Sayede, M. Ferreira, H. Bricout, S. Tilloy, E. Monflier, *J. Phys. Org. Chem.* **2011**, 24, 1129-1135.

(53) "Synthesis, Rhodium Complexes and Catalytic Applications of a New Water-Soluble Triphenylphosphane-Modified β-Cyclodextrin"

F. X. Legrand, N. Six, C. Slomianny, H. Bricout, S. Tilloy, E. Monflier, *Adv. Synth. Catal.* **2011**, 353, 1325-1334.

(54) "An N-heterocyclic carbene ligand based on a β-cyclodextrin-imidazolium salt: synthesis, characterization of organometallic complexes and Suzuki coupling"

F. X. Legrand, M. Ménard, M. Sollogoub, S. Tilloy, E. Monflier, *New J. Chem.* **2011**, 35, 2061-2065. (**Themed issue of New Journal of Chemistry dedicated to Pr. Didier Astruc on the occasion of his 65th birthday. Guest Editors: J.R. Hamon, J.Y. Saillard, J. Ruitz**)

2012

(55) "Cyclodextrin-phosphane possessing a guest-tunable conformation for aqueous rhodium-catalyzed hydroformylation"

D. N. Tran, F. X. Legrand, S. Menuel, H. Bricout, S. Tilloy, E. Monflier, *Chem. Commun.*, **2012**, 48, 753-755

(56) "Functionalized Cyclodextrins as First and Second Coordination Sphere Ligands for Aqueous Organometallic Catalysis"

F. Hapiot, H. Bricout, S. Tilloy, E. Monflier, *Eur. J. Inorg. Chem.* **2012**, 1571–1578.

(57) "Cyclodextrin/Amphiphilic Phosphane Mixed Systems and their Applications in Aqueous Organometallic Catalysis"

Michel Ferreira, Hervé Bricout, Nathalie Azaroual, David Landy, Sébastien Tilloy, Frédéric Hapiot, Eric Monflier, *Adv. Synth. Catal.* **2012**, 354, 1337–1346.

(58) "Aqueous biphasic hydroformylation in the presence of cyclodextrins mixtures: evidence of a positive synergistic effect"

Michel Ferreira, François-Xavier Legrand, Cécile Machut, Hervé Bricout, Sébastien Tilloy, Eric Monflier, *Dalton Trans.*, **2012**, 41, 8643–8647.

(59) "Carboxylated polymers functionalized by cyclodextrins for the stabilization of highly efficient rhodium(0) nanoparticles in aqueous phase catalytic hydrogenation"

Sébastien Noël, Bastien Léger, Rudy Herbois, Anne Ponchel, Sébastien Tilloy, Gerhard Wenz and Eric Monflier, *Dalton Trans.*, **2012**, 41, 13359–13363.

(60) "Water-soluble diphosphadiazacyclooctanes as ligands for aqueous organometallic catalysis"

Jérôme Boulanger, Hervé Bricout, Sébastien Tilloy, Aziz Fihri, Christophe Len, Frédéric Hapiot, Eric Monflier, *Catal. Commun.* **2012**, 29, 77–81.

(61) "Phosphane-Based Cyclodextrins as Mass Transfer Agents and Ligands for Aqueous Organometallic Catalysis"

Sébastien Tilloy, Cécile Binkowski-Machut, Stéphane Menuel, Hervé Bricout, Eric Monflier, *Molecules* **2012**, 17, 13062–13072.

2013

(62) "Diametrically Opposed Carbenes on an α -Cyclodextrin: Synthesis, Characterization of Organometallic Complexes and Suzuki-Miyaura Coupling in Ethanol and in Water"

Maxime Guitet, Filipa Marcelo, Ségolène Adam de Beaumais, Yongmin Zhang, Jesús Jiménez-Barbero, Sébastien Tilloy, Eric Monflier, Mickaël Ménand, Matthieu Sollogoub, *Eur. J. Org. Chem.* **2013**, 18, 3691–3699.

(63) "A cyclodextrin dimer as a supramolecular reaction platform for aqueous organometallic catalysis"

Claire Blaszkiewicz, Hervé Bricout, Estelle Léonard, Christophe Len, David Landy, Christine Cézard, Florence Djedaïni-Pillard, Eric Monflier, Sébastien Tilloy, *Chem. Commun.*, **2013**, 49, 6989–6691.

(64) "Hydroformylation in Aqueous Biphasic Media Assisted by Molecular Receptors"

Frédéric Hapiot, Hervé Bricout, Sébastien Tilloy, Eric Monflier, *Top. Curr. Chem.* **2013**, 342, 49–78.

2014

(65) "Recent breakthroughs in aqueous cyclodextrin-assisted supramolecular catalysis"

F. Hapiot, H. Bricout, S. Menuel, S. Tilloy, E. Monflier, *Catal. Sci. Technol.*, **2014**, 4, 1899-1908. DOI: 10.1039/C4CY00005F.

(66) "Low melting mixtures based on β -cyclodextrin derivatives and N,N'-dimethylurea as solvents for sustainable catalytic processes"

F. Jérôme, M. Ferreira, H. Bricout, S. Menuel, E. Monflier, S. Tilloy, *Green Chem.*, **2014**, 16, 3876-3880. DOI: 10.1039/C4GC00591K.

(67) Synthesis and characterization of a new photoinduced switchable β -cyclodextrin dimer.

F. Hamon, C. Blaszkiewicz, M. Buchotte, E. Banaszak-Léonard, H. Bricout, S. Tilloy, E. Monflier, C. Cézard, L. Bouteiller, C. Len, F. Djedaini-Pilard, *Beilstein J. Org. Chem.* **2014**, 10, 2874-2885. DOI: 10.3762/bjoc.10.304.

(This article is part of Thematic Series of Beilstein Journal of Organic Chemistry entitled "Superstructures with cyclodextrins: Chemistry and applications II". Guest Editor G. Wenz)

2015

(68) "Rhodium catalyzed hydroformylation assisted by cyclodextrins in biphasic medium: can sulfonated naphthylphosphanes lead to active, selective and recyclable catalytic species?"

M. Elard, J. Denis, M. Ferreira, H. Bricout, D. Landy, S. Tilloy, E. Monflier, *Catal. Today*, **2015**, In Press. DOI : 10.1016/j.cattod.2014.06.002

(69) Rhodium catalyzed hydroformylation of 1-decene in low melting mixtures based on various cyclodextrins and N,N'-dimethylurea.

M. Ferreira, F. Jérôme, H. Bricout, S. Menuel, D. Landy, S. Fourmentin, S. Tilloy, E. Monflier, *Catal. Commun.* **2015**, 63, 62-65. DOI : 10.1016/j.catcom.2014.11.001. IF = 3,389
(Special issue of Catalysis Communication dedicated to the use of alternative media and neoteric solvent in catalysis. Guest Editors Jairton Dupont and Frédéric Lamaty)

(70) Ruthenium-containing β -cyclodextrin polymer globules for the catalytic hydrogenation of biomass-derived furanic compounds.

R. Herbois, S. Noël, B. Léger, S. Tilloy, S. Menuel, A. Addad, B. Martel, A. Ponchel, E. Monflier, *Green Chem.* **2015**, 17, 2444-2454. DOI: 10.1039/C5GC00005J.

(71) Recent developments in cyclodextrin-mediated aqueous biphasic hydroformylation and Tsuji-Trost reactions.

F. Hapiot, S. Menuel, H. Bricout, S. Tilloy, E. Monflier, *Appl. Organomet. Chem.* **2015**, 29, 580-587. DOI 10.1002/aoc.3340.

(72) Tetrasulfonated 1,2-bis(diphenylphosphanyl)ethane as building block for synthesis of disulfonated alkyldiphenylphosphanes.

J. Denis, M. Ferreira, H. Bricout, C. Machut, S. Tilloy, E. Monflier, *Eur. J. Org. Chem.* **2015**, 5509-5512. DOI: 10.1002/ejoc.201500772.

2016

(73) "Cyclodextrins modified by metal-coordinating groups for aqueous organometallic catalysis: what remains to be done?"

S. Tilloy, H. Bricout, S. Menuel, F. Hapiot, E. Monflier, *Curr. Organocatal.* **2016**, 3, 24-31.
DOI: 10.2174/2213337202666150618192947.

(74) Methylated β -cyclodextrins decrease cholesterol release in smooth muscle cells and aortic endothelial cells via ABCA1- and ABCG1-mediated process

C. Coisne, D. Hallier-Vanuxem, M.C. Boucau, J. Hachani, S. Tilloy, H. Bricout, E. Monflier, D. Wils, M. Serpelloni, X. Parissaux, L. Fenart, F. Gosselet, *Frontiers in Physiology, section Lipidology* **2016**, 7, 185. DOI: org/10.3389/fphys.2016.00185.

(75) "Cleavage of Benzyl Phosphonium Salts as Efficient Bypass for Synthesis of Disulfonated Alkyldiphenylphosphanes Bearing an Oleum-Sensitive Alkyl Group"

J. Denis, M. Ferreira, H. Bricout, C. Machut, S. Tilloy, E. Monflier, *Eur. J. Org. Chem.* **2016**, 3322-3325. DOI: 10.1002/ejoc.201600555.

(76) "Ring Opening Polymerization of ϵ -Caprolactone in the Presence of wet β -Cyclodextrin: Effect of the Operative Pressure and of Water Molecules in the β -Cyclodextrin Cavity"

A. Galia, O. Scialdone, T. Spanò, M.G. Valenti, B. Grignard, P. Lecomte, E. Monflier, S. Tilloy, C. Rousseau *RSC Adv.* **2016**, 6, 90290-90299. DOI: 10.1039/C6RA20211J.

(77) "Methylated β -cyclodextrins decrease cholesterol release in smooth muscle cells and aortic endothelial cells via ABCA1- and ABCG1-mediated process"

C. Coisne, S. Tilloy, E. Monflier, D. Wils, L. Fenart, F. Gosselet, *Molecules*, **2016**, 21, 1748. doi:10.3390/molecules21121748.

2017

(78) "Enhance the rheological and mechanical properties of clayey materials by adding starches"

G. Alhaik, M. Ferreira, V. Dubois, E. Wirquin, S. Tilloy, E. Monflier, G. Aouad, *Constr. Build Mater.*, **2017**, 139, 602-610- doi : 10.1016/j.conbuildmat.2016.11.130.

(79) Transition metal complexes coordinated by water-soluble phosphane ligands: How cyclodextrins can alter the coordination Sphere?

M. Ferreira, H. Bricout, S. Tilloy, E. Monflier, *Molecules* **2017**, 22, 140 - doi: 10.3390/molecules22010140

(80) Catalysis in cyclodextrin-based unconventional reaction media: recent developments and future opportunities

F. Hapiot, S. Menuel, M. Ferreira, B. Léger, H. Bricout, S. Tilloy, E. Monflier, *ACS Sustainable Chem. Eng.* **2017**, 5, 3598-3606 - doi: 10.1021/acssuschemeng.6b02886

(81) Deep eutectic solvents: a promising medium for Volatile Organic Compounds absorption

L. Moura, T. Moufawad, M. Ferreira, H. Bricout, S. Tilloy, E. Monflier, M.F. Costa Gomes, D. Landy, S. Fourmentin, *Environ. Chem. Lett.* **2017** - doi: 10.1007/s10311-017-0654-y
